

## Refurbishment and redevelopment - 85m<sup>2</sup> Product: SlimFix®-TR 25mm composite panel

Worried about installing underfloor heating? Don't be. We will work alongside you - and what's more, you'll speak with the same Technical Sales Adviser from start to finish.

This property was to be completely refurbished and modernised. Working with the developer and heating engineers, we came up with the optimum system, including the use of our SlimFix®-TR insulated panels.

The build was brought up to current regulations in terms of insulation levels by incorporating external wall insulation and new double glazing.

As the developer wanted an efficient system, and height in the property was at a premium, underfloor heating incorporated in the SlimFix®-TR panel was the obvious choice.

SlimFix®-TR is a thin (25mm), single underfloor heating panel designed to make fitting underfloor heating easier and faster. It has a lower compressive strength than its companion product SlimFix®-25, and provides a cheaper solution.

### The solution

The Technical Sales Adviser worked with the heating engineer to evaluate the best solutions for the new underfloor heating system. The engineer's preference was for SUPERflex™-16 pipe. Quite often, the solution is simple, and that's one of the major benefits of working with experts like us - we know

never to overcomplicate things. In this case, the SlimFix®-TR method was the perfect solution and would be compatible with the engineer's choice of SUPERflex™-16 (AluPlas® 16mm pipe also works well with this system).

Another advantage of working with a specialist like us is that we can supply a full range of systems which will heat the property efficiently and fully.

### Our advice

New build or renovation, we have all the advice you need to get the job done on time, every time.

Whether you have a specific project in mind or just want some advice, speak to one of our experienced Technical Sales Advisers on 030 8903441 or email [info@continal.nl](mailto:info@continal.nl).

*Underfloor heating isn't just for new builds. We will also work with you on your refurbishment projects.*
